# A unique mobile dune

## THE BIGGEST DUNE OF GALICIA

The Nature Reserve extends over 1000 hectares of land in the borough of Ribeira. The immense and spectacular mobile dune, which overlooks A Ladeira beach, is the Reserve's main attraction. In order to protect it, public access to the dune is forbidden.

Visitors can also discover the Arousa and Muros and Noia rías (coastal inlets). As well as the dunes, A Ladeira and O Vilar beaches are well worth visiting, as are the Vixán freshwater lake and the Carregal saltwater lake.

Other places we recommend visiting are the Pedra da Rá

and Castro da Cidá vantage points and the megalithic dolmen in Axeitos. 20 km north of the Reserve lies the Castro de Baroña, the best preserved hill fort settlement in Galicia. Ribeira port is Spain's most important inshore fishing port and we would recommend a visit to the fish market to watch an auction and see the fish being unloaded when the boats return to port.

In recent years, the town of Corrubedo has become an ideal place to relax and spend some time by the sea, surrounded by nature.

*The chance to explore the park is within everyone's reach.*

## 🚶 ACCESSIBLE CORRUBEDO

The best way to discover the Park is on foot. There are several easy and totally accessible routes. From the Reception Centre, visitors can choose to follow the Camino da Praia (Beach Trail) or the Camino da Gandarela, (A Gandarela Trail), which leads to Carregal lake. If you would like to see the Vixán lake, take the Camino del Agua (Water Trail) which starts at the beach car park; this trail is partially suitable for people with limited mobility.

ROUTE	TIME	DISTANCE	TYPE
Camino do Vento	30 min	1,5 km	LINEAR
Camino do Río do Mar	1,30 h	3,5 km	LINEAR
Camino da Praia	45 min	1,5 km	CIRCULAR
Camino da Gandarela	2 h	6 km	CIRCULAR
Camino da Auga	2 h	2,5 km	CIRCULAR

*A bird-watcher's paradise all year round.*

## CORRUBEDO BIRDING

Corrubedo is an ornithological paradise well worth discovering. It is an important breeding ground and wintering area for migratory birds which can be visited all year round. The Park is host to coastal habitats such as beaches, rocky shores, marshland and dunes; and birds can also be seen inland in areas of woodland, farmland, pools and scrubland. At the Vixán lake there is a bird observatory where beginners can take up bird-watching. The best time of year for this activity is between September and April. Having said this, in

winter a large number of water birds use the lakes to rest and feed.

Ducks, cormorants, European golden plovers, grey herons and swans are among the most notable species. Download the free Birding Galicia app and enjoy the three routes it suggests, two of which are by car and the third suitable for walking and cycling.

*Visit the vantage points for a great view of the dunes from above.*

## CORRUBEDO FROM THE AIR

Aquiño offers the vantage point known as Pedra da Rá, from where you enjoy the best view of the dunes as well as the mouth of the Arousa ría and the area's different towns, such as A Pobra do Caramiñal, Corrubedo and its famous lighthouse, as well as Sálvora Island.

If we follow the dirt trail that lies to its right, we come to another vantage point called O Castro da Cidá, which is 210 m above sea level and is the remains of a hill fort settlement. Another spectacular vantage point is to be found near A

Pobra do Caramiñal, known as A Curota, rising 500 m above sea level. After leaving the car, we have to climb a series of stone steps, but it is more than worth the effort, as the views of the Reserve, the Muros and Noia ría and the Arousa, Cíes and Sálvora Islands are absolutely spectacular.

## Parques Naturais de Galicia | Serra da Enciña da Lastra

The holm oak, a tree typical of Mediterranean climates, and its 25 different species of orchid have made this Park exceptional within the Galician landscape. It is well known to speleology lovers, given the number of caves known here as 'palas'.

## Parques Naturais de Galicia | Monte Aloia

Galicia's first Natural Park to undergo tailored reforestation at the hands of the engineer Rafael Areses. Legend has it that this is Monte Medulio, the scene of the collective suicide of Celtic tribes in order to avoid falling into the hands of the Roman invaders.

## Parques Naturais de Galicia | O Invernadeiro

A natural area with no human settlements in the immediate surroundings. Nature in its wildest state represented by the wolf, which lives alongside its main prey, such as roe deer and boars. Its rounded peaks share a space with a surprising glacial cirque and spectacular waterfalls.

## Parques Naturais de Galicia | Baixa Limia Serra do Xurés

Galicia's largest Natural Park, which also forms part of the border with Portugal. Rugged granite mountains and magnificent stone boulders make it different from other protected areas. It also has many megalithic monuments and bears witness to the passage of the Roman legions along the XVIII road, also known as Via Nova.

## Parques Naturais de Galicia | Fragas do Eume

The best-preserved Atlantic coastal forest in Europe. The River Eume and the Caaveiro and Monfero monasteries are its main attractions. A magical forest which hides more than 20 species of fern and 200 species of lichens on its humid riverbanks.
